SYSTEM SOLUTIONS

X2 Temperature Recorders
The basis for System Solutions
in the Temperature Controlled
Transport Industry

Euroscan offers the system solution

Euroscan has more than 10 years of development experience in the area of electronics for the automotive industry. This experience and in house production guarantee first class quality, which can be relied upon under all circumstances and makes Euroscan the leading supplier of system solutions in the area of mobile temperature monitoring in the world.

X2: The *new* generation temperature recorder

The Euroscan X2 is the basis for high quality system solutions. The new temperature recorder, either truck or trailer version, is the basis for Euroscan's modular system world. This new generation temperature recorder offers unique features for the perfect control and monitoring of critical temperature parameters.

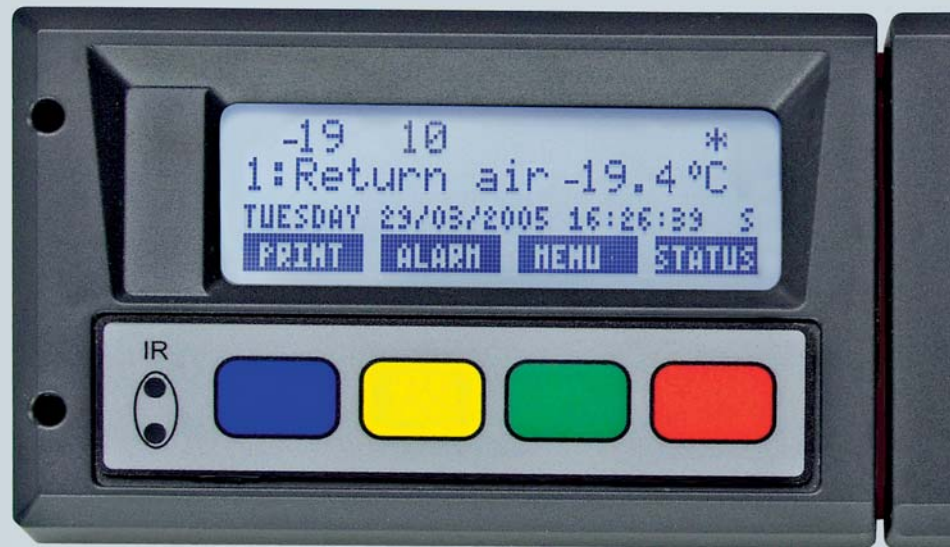

The Euroscan X2 can be universally used for all transported goods:

- Food
- Electronic Parts
- Chemicals
- Pharmaceuticals
- Flowers
- Transport of Live Animals

Euroscan's modular system solutions are always state of the art and always consider the latest national and international regulations.

Whether your fleet is large or small: We provide the ideal solution for all requirements.

Euroscan – Be on the safe side !

The Euroscan X2 conforms to and is certified to all national and international regulations and guidelines.

For the fulfillment of the 2005 hygiene regulations the Euroscan X2 is an indispensable tool, all necessary documentation can be done automatically.

The Euroscan X2 is an investment for the future. Depending on your needs, different modular extensions can be retrofitted at any time to give you your required functionality.

The advantages:

- User-friendly due to large display and big keys
- Maintenance free printer which is easy to handle
- Can be used with cooling systems and on vehicles from all manufacturers
- Modular system structure combined with an open concept
- Single and multiple compartment monitoring, with full alarm options
- Recording of all individual event parameters like doors, defrost, fridge on/off etc.
